

EXTRA DURABILITY

MB PRO SERIES

PRODUCT OVERVIEW

The MB PRO Series is intended to be used in environments that requires extra durability. The entire body of the lamp is made in one piece of aluminium, that can withstand the most extreme conditions. What unites all models is a cooling system that offers an extraordinary thermal management, a waterproof ingress protection (IP68) and a penetrant resistant sealing.

All models come with extra batteries but can be charged and operated simultaneously. MB PRO is available with two different peak intensities, with or without white light, and with or without Athena spray can holder.
