

INSPECTORS KIT

KIRUNA & KIRUNA PRO KIT

The Kiruna KIT has been developed in response to customer demand for a more flexible and practical solution for field inspections. Based on the proven Uppsala Kit concept, both the Kiruna KIT and Kiruna KIT Pro feature an updated interior tailored to support inspectors performing MPI in the field. The interior has been designed with reference to the dimensions of leading magnetic yokes on the market, ensuring a practical layout for mobile inspection work. The new interior can also be supplied separately for existing cases upon request. Straightforward and efficient, the Kiruna KIT range is built to match the way inspectors actually work in the field.

KirunaKIT

P/N: K011

Kiruna KIT PRO

P/N: K012

The Kiruna KIT PRO is intended to be used in environments requiring extra durability.
